

## Construction Materials Recycling Center - T:(718) 698-1100

Richmond Recycling is a fill material transfer station conveniently located in the heart of the New York Metropolitan area with immediate access to NYC, Central New Jersey and the surrounding areas. Our site is unique in that it offers 680ft dock access, rail and direct highway access via the various bridges on Staten Island. Our plant is ready to accept your construction debris for recycling and supply you with our various aggregates.

With our two scales, staging areas, and trained personnel, we are able to expedite the traditional dumping and loading process. Our 680ft dock allows construction debris and aggregates to be imported or exported to our location via the surrounding waterways. With mile long rail access, we have the capacity to handle 100 freight cars, providing one of the most cost effective modes of shipment. These are the qualities that make our site unique.
